

SHAKE and SPILL

1. **Count out the number of 2-color counters that match your focus / just right number.**
2. **Get a paper cup and a ten-frame recording sheet.**
3. **Shake and spill the 2-color counters.**
4. **Record the number of red and number of yellow counters on your ten-frame recording sheet. Use red and yellow colored pencils or crayons.**
5. **Repeat 9 more times.**
6. **Are there combinations you spilled several times?**
7. **Are there combinations you never spilled?**

Variation:

Record the combinations on a bar graph to keep track of how many times you spill the same combination.

Compare with other students with your same focus number.
